

Data linkage and how to access data for research purposes from the Statistical Services Branch, Queensland Department of Health

Wednesday 22nd August 2018

This seminar will outline the available datasets and linkage services for health researchers as well as provide information about the approval process to access data from the Statistical Services Branch, Queensland Department of Health. This will assist current health researchers, who are working on or planning projects that use linked health record data such as hospital admissions or perinatal data

Facilitators:

Catherine Taylor –

Principal Data Linkage Officer,
Statistical Services Branch,
Department of Health

Ann Harrington –

A/Principal Linkage Officer (Client Services),
Statistical Services Branch,
Department of Health

Dale Steinhardt –

Senior Data Linkage Officer,
Statistical Services Branch,
Department of Health
