

Knowledge brokers to get evidence into policy & practice: Escaping the 'dark side'

Tuesday 5 November 2019

AusHSI Adjunct Visiting Fellow Seminar: Dr Roman Kislov

Senior Research Fellow, Alliance Manchester
Business School

This talk will reflect on the rise of knowledge brokering as a strategy for translating scientific research into healthcare policy and practice. Drawing on a 10-year programme of research conducted in a large-scale collaborative research partnership, it will explore different dimensions and types of knowledge brokering, discussing implications for evaluating its effectiveness. Particular attention will be paid to the 'dark side' of knowledge brokering and strategies that could be used to address it.

Bio

Dr Roman Kislov is a Senior Research Fellow in the Health Services Research Centre which is part of Alliance Manchester Business School at the University of Manchester. He conducts qualitative research on the processes of knowledge mobilisation, with a particular interest in communities of practice, intermediary roles, organisational learning and implementation of change.

He is currently leading a longitudinal study into the development of knowledge mobilisation strategies over time and a multiple case study of research coproduction in multi-professional project teams, which are both funded by the National Institute for Health Research Collaboration for Leadership in Applied Health Research and Care (NIHR CLAHRC) Greater Manchester – a partnership between the University of Manchester and local providers of health services.
